ABOUT US

Take a step into the future and call Comaschi where experience cuts...

Comaschi Excavation & Demolition Pty Ltd was established in 1999 with the introduction of the first 13 T excavator rock saws in Australia. With the company's experience in demolition and earthworks it focused its future around the rock saws for rock detail, trenching and non - vibration earthworks.

Rock saws have pushed this company into the future with many major projects and customers taking advantage of Comaschi's experience in non-vibration earthworks, rock detail and trenching.

We offer a wide variety of rock saws for trenching, sub soiling, quarry blocking and detail, Comaschi can supply the right saw for the right job.

Comaschi is a family run business and is focused on customer care and quality of service, we run a new fleet of Komatsu and Sumitomo excavators to minimize breakdown and offer maximum production.

With the introduction of Diamond rock saws and Grinders, Comaschi has achieved the impossible in very hard rock jobs around Australia

AVAILABLE ATTACHMENTS

- TOPCON GPS
- HAMMERS
- TILT BUCKETS
- ROCK AUGERS
- RIPPERS
- ROCK GRINDERS
- TUNGSTEN SAWS
- DIAMOND SAWS
- GRABS

TUNGSTEN TIP SAWS

Tungsten saws are used for sawing detail, trenches, wall sawing, quarry blocking for rock strengths rated from soft to hard...

Sandstone, Shale, Limestone, Tuff, soft Bluestone are just some of the material that these saws can cut.

Depending on blade and pattern type average cutting width is 80 mm

AVAILABLE BLADES

Subsoil
0.180mm wide x 0.650mm deep cut

Wall Sawing and Trenching
0.80 mm wide x 1.1 mm cut

DIAMOND TIP SAWS

Diamond saws are used for the same type of jobs as the tungsten saws but can cut much harder material including very hard Bluestone, Granite, Marble, Tuff, Concrete.

Diamond tips are designed to cut faster, cleaner, quieter and with no dust – as long as water is used Segments can be designed depending on what type of rock we are cutting..

AVAILABLE BLADES

1.2 m to 3.0 m Blades available
(depending on what material will be cut)

Segments to cut Bluestone
Granite, Sandstone, Tuff,
Concrete etc.

ROCK GRINDERS

Rock Grinders can be used for a variety of jobs from Trenching, trimming of walls, floors, driveways, ramps, trimming between piles, cut outs etc

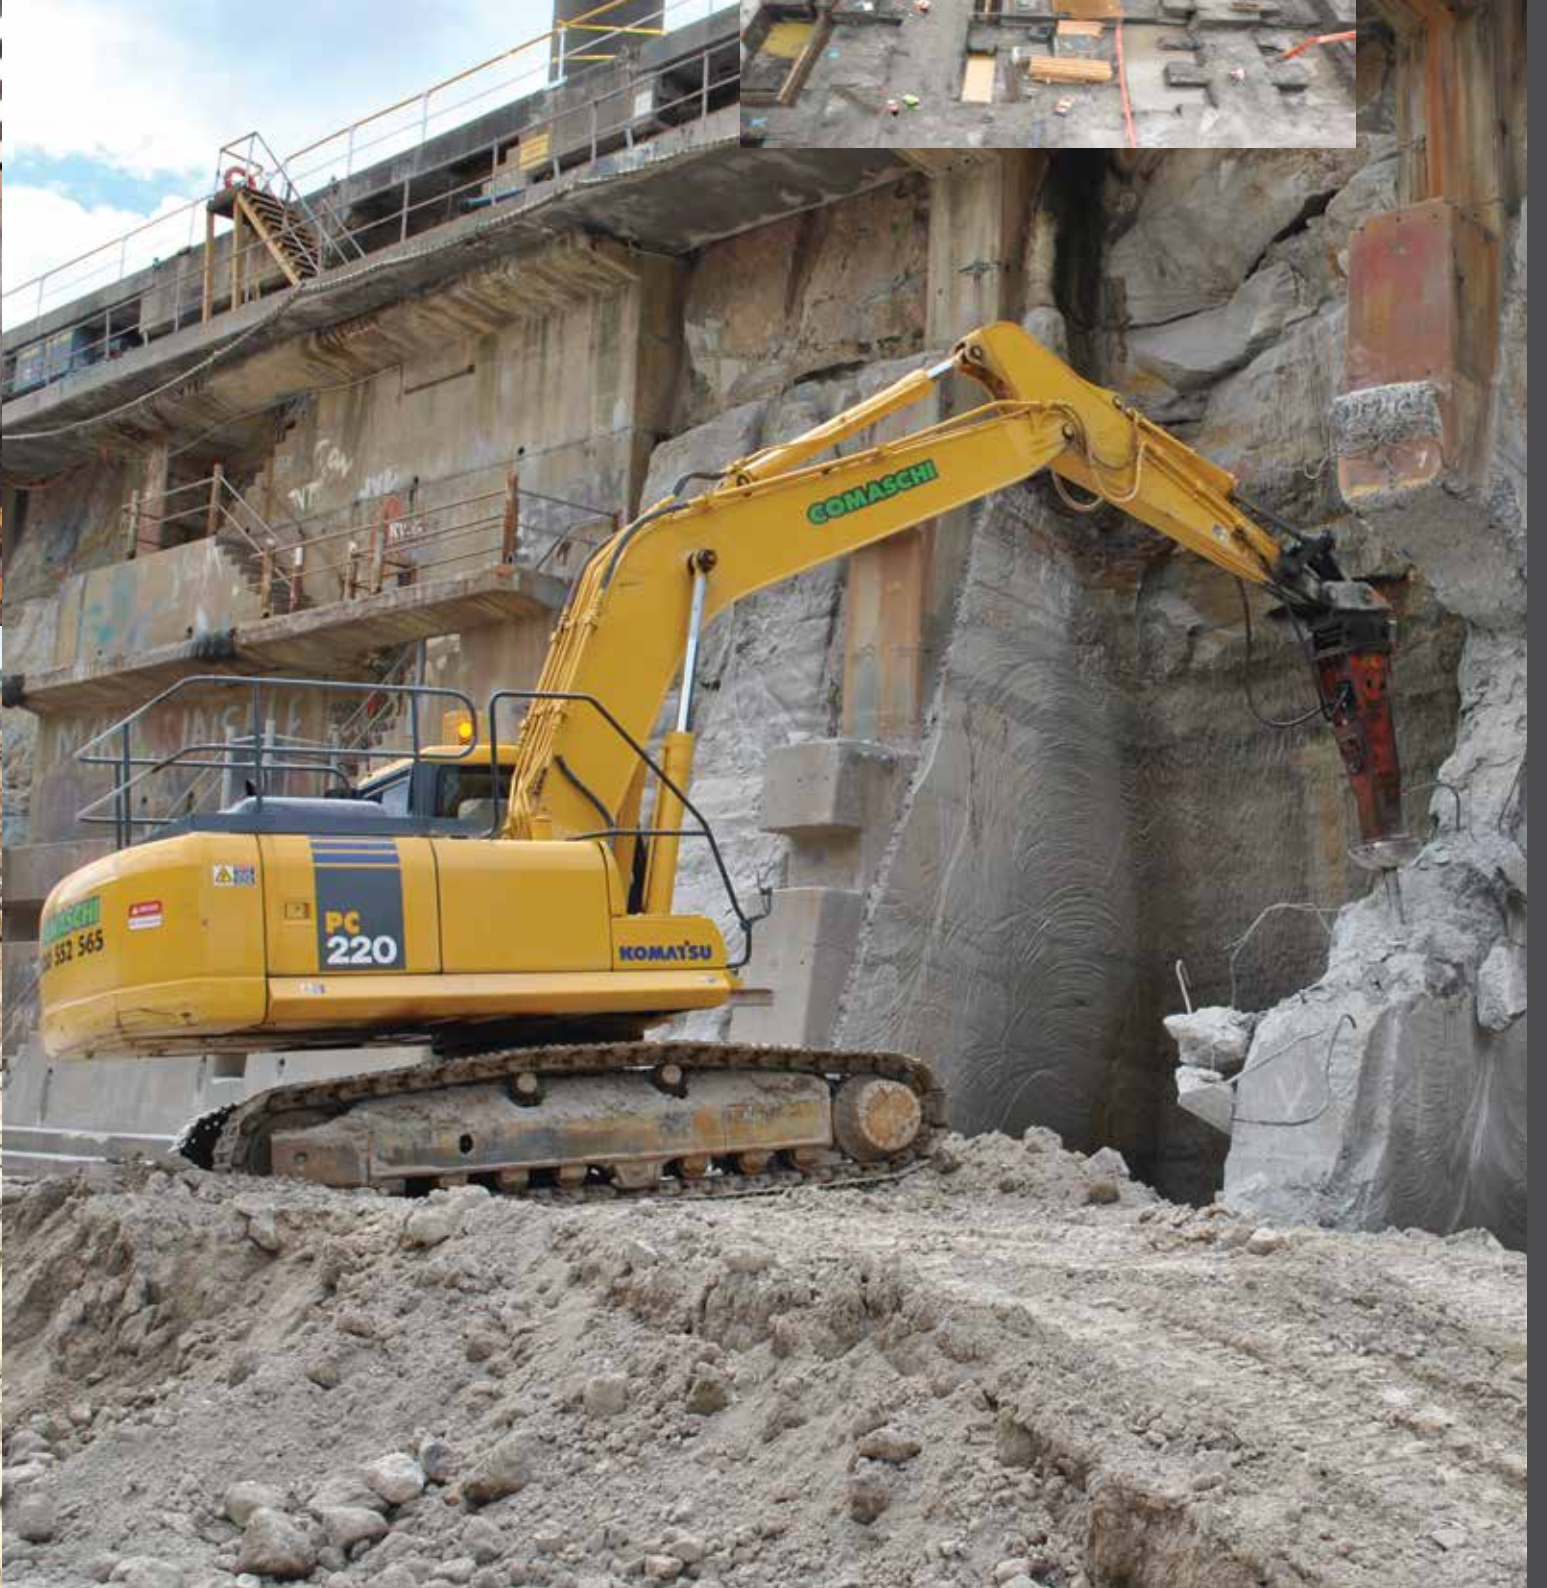

Mostly used for final trim and non vibration earthworks, rock detail and shaping.

ROCK DETAIL

Rock saws & grinders are used for detail in any soft to hard rock materials.

Trenching, Pads & Footing, Plumbing, Cut Outs, Ramps, Lift Pits ...
